

Medan, 24 Februari 2017

Nomor : 0013/KB/SMART/II/2017
Lamp : 1(satu) berkas
Hal : Permohonan Pemasukan Peralatan Pabrik / Suku Cadang Barang Modal
(Sparepart Of Melting Tank - Beaver Contromatic Pte Ltd)

Kepada Yth :
Kepala Kantor Pengawasan dan Pelayanan
Tipe Madya Pabean B Medan
Di Tempat

Dengan hormat,

PT. Smart Tbk yang berlokasi di lokasi I Jalan Belmera Baru III, Kecamatan Medan Belawan, Medan, Lokasi II Jalan Ujung Baru, Lingkungan IV, Kecamatan Medan Belawan, Medan, Lokasi III Pelabuhan Belawan, Belawan I, Kecamatan Medan Belawan, Medan telah mendapat izin sebagai PKB merangkap PDKB sesuai Keputusan Menteri Keuangan Republik Indonesia nomor 3109/KM.04/2014 tertanggal 23 Desember 2014 yang ditetapkan di Jakarta.

Sehubungan adanya pemasukan barang modal ke Kawasan Berikat PT.Smart Tbk maka dari itu kami memohon agar diberikan penangguhan Bea Masuk dan tidak dipungut PDRI atas : **Sparepart Of Melting Tank** terlampir AWB , invoice, packing list dan katalog . Dimana barang impor tersebut yang dimaksud ini untuk menambah kegiatan produksi kami.

Demikian permohonan ini kami sampaikan kiranya Bapak dapat mempertimbangkannya, kami ucapkan terima kasih.

Hormat Kami,

Rebo Wy
General Manager

Sampling Valve with Opening Indicator

AVAILABLE ON MODELS

SV-500 3/4" x 1/4"	SV-700 3/4" x 1/4"
SV-600 1/2" x 3/8"	SV-800 1" x 3/4"
SV-700 FLG	SV-800 FLG
SV-900	SV-1000

- 1 No dead spot – piston completely fills valve and extends to inner surface of pipe
- 2 Always gives a live sample
- 3 Open-piston is retracted into body allowing full free flow
- 4 Valve is kept tight by two compressible valve rings

PISTON-TYPE SAMPLING VALVE SPECIFICATION

The Sampling Valve shall be a Model SV700 3/4" MNPT inlet* by ____" FNPT (1/2" or 3/4") outlet*. The body shall be investment cast 316 stainless steel and internals of 316 SS fabricated wetted parts. The valve shall be a soft seat design of Teflon that shall meet ANSI Class VI, bubble tight shut off. The piston shall have linear travel with a rising stem with multi-turn handle for manual operation, or a pneumatic or hydraulic cylinder for automatic operation. The piston shall completely fill the valve interior allowing for no cavities (dead space), the valve will be self-pigging and will not clog. The Sampling Valve will insure new product samples are always taken with no prior sample material remaining. The piston shall have a ____" extension that shall extend beyond the threaded inlet to break through any product crust insuring proper sample flow.

*Also available with Flanged, or SW inlet and outlet connection. For other Sampling Valve Models refer to the size tables.

To keep abreast of our customers' requirements, Strahman Valves, Inc. includes an OPENING INDICATOR on its line of hand operated Piston-Type Sampling Valves (on all models up to 6" piston extensions*). The indicator shows the operator of the valve that the product, which is normally under pressure, is in position to start flowing through the valve and tells him to be cautious and open the valve slowly so there will not be a sudden surge of product.

The INDICATOR is attached to the valve directly under the valve handle and extends up the side of the bonnet. When the valve is in the fully closed (extended) position the indicator extends beyond the upper edge of a raised ring on the bonnet, which is marked "OPENING."

As the operator turns the valve handle counter-clockwise, the indicator lowers as the piston is being retracted to the fully open position. When the tip of the indicator is flush with the upper edge of the "OPENING" ring on the bonnet it is indicating that the piston is moving through the sealing ring and the product is ready to flow through the valve. At this point, the operator should turn the handle slowly to avoid any sudden burst of product which would be under pressure.

*not available on valves above 6" piston extensions.

PED Compliant
